---

The interest in a Strum-Kontakt-VST Instruments such as the LP-Guitar or the DM3-Guitar has been growing. The reason is simple. Strum-Kontakt-VST-Instruments are able to produce the interesting sounds of...a real LP-Guitar. As a consequence, it is easy to adapt a Strum-Kontakt-VST-Instrument to a standard setup. A real Rack Extension has been developed to be able to enjoy all the ambience of a real Guitar. The LP-Guitar of The Fuzz Factory sounds very much like a real Guitar thanks to its Ampeg Bassman Bass Amplifier and its Fernandes Twin Speaker Cabinet. It is also worth mentioning the quality of the preamp.

Other details such as the Tone-Arm and the soundproofing cabinet are also very good. All the details create a very good impression of a real Guitar. Installation Details The LP-Guitar is installed into Kontakt 4/5. As for the DM3-Guitar, the files will be included in the update of the VST Instrument. As a result, this release of the Fuzz Factory LP-Guitar should be update in the future. Now, download the PATCHES by clicking on the links below. All the patches are in the ZIP archive. The Patch 1

Patch is for Ampeg Bassman. The Patch 2 Patch is for Fernandes Twin Speaker Cabinet. The Patch 3 Patch is for a soundproofing cabinet. The Patch 4 Patch is for a Tone-Arm. The Patch 5 Patch is for the preamp of the LP-Guitar. We use cookies to ensure that we give you the best experience on our website.
